Hormones

Hormones are the juice of life and we age largely because our hormones decline. The Eternity Medicine Institute offers aging men and women the chance to rejuvenate themselves. Fifty million men are going through Andropause and fifty million women are going through Menopause in the US alone, and they are suffering unnecessarily. Our physicians are expert in the replacement of Bioidentical Hormones in both men and women. Bioidentical Hormones are effective and safe and the treatments is available right here at Eternity.

By replacing hormones to the level of a youthful 25-30 year-old, you can feel younger, look younger and actively reduce the silent inflammation of the endothelium, the single layer of cells that lines the 50,000 miles of blood vessels in the human body. This inflammation is responsible for most cardiovascular disease, and many other chronic and age-related conditions.

Who should consider a Hormone test?

In theory everybody should know the most important bi-omarkers of your body (would you drive your car without measuring the oil level?). Specifically if you answer some of the below questions with yes, you could benefit from the test.:

- ✔ Are you often tired?
- ✔ Do you have less vitality?
- ✔ Do you experience a loss of libido?
- ✔ Do you or your family have diabetes?
- ✔ Do you have mood swings?
- ✔ Do you gain weight easily?
